

## Virus Protection Protocol

What we are doing at East Shore Healthcare to enable you to come to our clinic & feel SAFE.

- DO NOT come in thru the door; call us from the parking lot and provide a description of your vehicle (make, model, color).
- We'll call and come for you when ready, then escort you into a freshly sanitized room (It may smell a little like Clorox).
- No need to touch door handles; we'll open the doors for you.
- If it's necessary to use bathroom we'll open and close the door for you at that time; or upon leaving you may open handle from inside with a forearm, elbow or paper towel wrapped around the handle.
- Upon exiting from the clinic, we shall once again open doors for you; outer door can/may be opened without hands with a hip or forearm.

- There will be no other patients in the reception room at any time during your visit; only staff will remain in the clinic during your visit.
